

Magnet Dots

Hella Jongerius, 2016

vitra.

The organic contours of the Magnet Dots recall the form of pebble stones. Coated with a layer of robust plastic, the small yet strong magnets can be used to fasten notes or papers to the wall. With their vivid colours and unusual shape, these eye-catchers brighten both homes and offices and can also serve as purely decorative elements.

different colour sets. Consisting of five magnets, each set contains different shades of one colour family: red, green, light or dark. The colour combinations were carefully defined by Hella Jongerius to create a harmonious range of tones.

- **Dots:** dyed-through polypropylene.
- **Magnet:** inset ferrite magnet. One magnet can hold up to 5 sheets of paper (DIN A4).
- **Package contents:** 5 Magnet Dots per set.

The Magnet Dots are available in four
