Leather Texas 10

### Form and Function

Trenton is a fusion of the best of design, craftsmanship and function, which makes it the perfect sofa both for the small family with children as well as for the single in a little luxury apartment.

The sofa is constructed of a frame in solid Swedish pine wood and legs in brushed stainless steel. The seat cushions consist of a down-top pillow with a core of polyurethane foam and back cushions with 100 % down and duck feathers.

Designed with clean lines and a light expression by Jens Juul Eilersen.
