Assembly instructions and important information AD 32

Technical details:

Power supply: 110-240 V / 50-60 Hz

Bulb socket: E27

Protection class: I

Maximum wattage (thermal):

75 W

Recommended bulbs:

energy-saving bulb 15 W

Note:

This specified maximum wattage applies to conventional bulbs. Since these have however been off the market since 01.09.2009, we recommend energy-saving bulbs with about 1/5 of the specified wattage.

Halogen bulbs are not suitable because these become much hotter than conventional bulbs.

We do not recommend using **clear glass bulbs**, since such bulbs cast a shadow onto the opal glass.

Safety instructions:

- Never cover the luminaire with a cloth – fire hazard!
- Always ensure that the plug is removed from the socket before working on the luminaire or changing the bulb.
- Have repair work performed only by an authorized electrician, because electrical power can cause severe injuries!
- Some of the lamp components may get very hot in operation! Avoid skin contact with these components to prevent burns.

Care of lamp:

Use a standard commercial cleaner for the glass parts.

For the chrome plated parts use a chrome polish.

For cleaning the brass feet, treated with zapon, please only use a cotton wool.

Glass ball:

The glass ball is flashed-opal and mouth-blown in one piece by means of a glass-blower's pipe. Some surface unevenness and small air bubbles are normal and do not impair the illumination quality.

Mounting the glass ball:

- Unscrew the three **spherical feet with small threaded tubes** out of the light's body completely.
- The chrome-plated cover is now loose, so that you can guide the locking piece (light's body with lamp-holder and light bulb) into the glass ball.
- Now fit the chrome-plated cover with the spherical feet again.
