

# Chouchin reverse, suspension design Ionna Vautrin 2015

FOSCARINI

Chouchin is a Japanese word meaning those traditional symbolic paper and bamboo lanterns typically used as light and bright signs outside restaurants and bars, or as lucky charms outside homes. Simple and stylish, Chouchin teams unique craft-based expertise with a modern and strikingly simple style. The Chouchin family comprises 3 models with a coloured matt glass body. Beside the first version a new one is born: Chouchin reverse. The shapes are the same but the colours have been inverted; the diffuser is now white while the collar stays the same colour

as the previous shape. It is not just about a new colour, but rather a new light, a new use even. Indeed, Chouchin reverse, thanks to the pale blown glass diffuser, not only directs light downwards – like the original Chouchin - but it also diffuses a brilliant, flowing and emotional light into its surroundings.

# Chouchin reverse, suspension technical info

FOSCARINI

## Description

This is a new collection of suspension lamps rather than an enlarged range. The idea of reversing colours in Chouchin is almost banal. Where colour was the absolute protagonist, it now becomes a touch of elegance that distinguishes Chouchin reverse from the other suspension lamps with shiny white glass. The decoration on the collar shows uncommon artisan skill. The light diffusion is completely different from Chouchin: light is diffused into the space and aimed downwards. The other lamp components are unchanged from the original version.

**Materials** lacquered blow glass

**Colors** white/orange, white/green, white/grey

# Chouchin reverse, suspension multiple composition

**FOSCARINI**

## Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.

## Ionna Vautrin

Born in France, Ionna Vautrin is graduated from L'école de design Nantes Atlantique in 2002. She worked successively for Camper in Spain, and by the Studios of George J. Sowden in Italy and of Ronan & Erwan Bouroullec in France. At the same time she develops its own works with different design companies: first time with Industreal in Milan, then with the Tools Galerie in Paris and since 2010 with Foscarini.
